github.com/MaylVrosa · maylvrosa.github.io

PROFILE

Making a structured transition from Law to Data Science. Previous experience in legal practice, jurimetrics and team management, where data was a tool to understand patterns and support decisions. Currently building skills in Python, SQL, advanced Excel and Power BI, with a practical focus: turning information into clear, useful and applicable decisions. Hands-on experience with international customers, communication and business acumen.

PROFESSIONAL EXPERIENCE

Sales & Customer Service

[MONTH 20XX] — present

Mundo Fantástico da Sardinha Portuguesa — Lisbon, Portugal

- Multilingual service to international customers, with brand storytelling and upselling.
- Support for stock management and replenishment, tracking demand patterns.
- Created a multilingual customer-service guide (13 languages) adopted in the store's daily routine.

Lawyer · Jurimetrics & Team Management

[20XX] — [20XX]

[Firm/Company] — Brazil

- Legal practice focused on legal data analysis (jurimetrics) to support case strategy.
- Team management and coordination, process definition and KPI tracking.
- Bridge between business needs and structured information — the origin of the move into data.
